

Product Technical Data Sheet

Product Name : Barite 4.20

Chemical name : Barite 4.20

Product Application :

Barite with a specific gravity of 4.2 (Barite 4.2) is widely used in various industries. It is primarily used in the oil and gas drilling industry as a weighting agent in drilling fluids. It is also utilized in the production of paint, rubber, plastic, paper, ceramics, and chemicals. Due to its high density and chemically stable properties, barite is also used in medical applications and radiation shielding.

Typical Properties

Characteristic	Specification
BaO	57%
Pb	2.8%
Ag	19 ppm
SiO ₂	3.6%
So ₃	3.6%
Petrola Co.
